Fit for recovery and transition: Supporting Quality of Public Administration in the European Union Member States

Multilevel interoperability governance supporting digital transformation of European public administrations

Citizens and businesses expect to be served through seamless digital services wherever they live, travel or work in the EU. To ensure their delivery, all levels of government should be able to share the necessary data while respecting citizen rights, data privacy and protection. In addition, they need to ensure that no barriers, cultural, legal, organisational or semantic/technical, hamper the provision of interoperable services across cities, regions and national borders. Communities, Cities and Regions are teaming up to join efforts in their digital transformation the European way through the Living-in.eu movement while national governments and the EU are working on a future EU public service interoperability policy. The workshop aims at opening a discussion on how best to ensure a multilevel interoperability governance in this context. Local data platforms and Digital Twins will be used as an example to illustrate such interoperability needs.

Agenda

14 :50 -14 :55	Short Introduction *Roman Diez Gonzalez – DG REFORM*
14 :55-15 :00	Local digital twins highlighting interoperability needs from local up to EU level • *Andrea Halmos – DG CNECT*
15:00-15:05	Proposal for an EIF4SCC • *Serge Novaretti – DG CNECT*
15:05-15:10	Future EU interoperability policy – Interoperability governance act • *Isa Katharina Von Kalben - DG DIGIT* • *Maximilian Strotmann – DG DIGIT*
15:10-15:15	The Portuguese case • *Ana Marques*

15:15-15:45	Panel Discussion and Q&A session
	• *Moderator Martin BRYNSKOV (OASC)*
	   o *Ana MARQUES (Portugal Digital)*
	   o *Francisco RIDRUEJO (RECI and Logroño city)*
	   o *Patrick RUESTCHMANN (France, DINUM)*
	   o *Mika RANTAKOKKO (Oulu city)*
	   o *Jonas ONLAND (VNG, Dutch association of municipalities)*

15:45-15:50	Close of Workshop • *Serge Novaretti – DG CNECT*
