

Context

Commission communication **Enhancing the European Administrative Space** aims to support public administrations become more resilient, innovative, and skilled. The ComPAct's digital pillar provides a strategic set of actions to strengthen Member States administrations' capacity to effectively implement EU legislation in the digital realm and deliver on the targets related to the digitalisation of public services set out in the Digital Decade policy programme. In addition, the digital pillar works on making public administrations benefit from integrating artificial intelligence (AI) technologies in a safe and trustworthy way. This proposal for a flagship initiative is designed to support Member States' public administration lav the necessary groundwork for the use of Al technologies to provide high quality and inclusive service to citizens.

To leverage AI technologies effectively, public administrations must invest in foundational elements to make their digital transformation

more effective, such as: implementing a digital-ready policy-making mindset. designing business processes, information enhancing systems. and services, governance interoperability, data accessibility, and ensuring higher levels of cybersecurity and privacy. These are key creating the technological for and organisational foundations to make public administrations truly data-driven. further improve their internal operations, create smarter policies, and better targeted, userfriendly services. This will facilitate the integration of AI technologies and make data accessible to them by enabling data sharing across departments, databases, and borders. In addition, these changes can enable wholeof-government approaches whereby diverse ministries, public administrations, and public agencies work together to collaboratively operate and enhance their operational effectiveness and service delivery via the integration of AI technologies.

Building capacity of Member States' public administrations for Europe's Digital Decade by strengthening their interoperability and making them ready to safely and trustworthily integrate Al technologies into their operations.

Objectives

To support Member States' public administrations build their capacity for Europe's Digital Decade by strengthening their interoperability (in line with the Interoperable Europe Act) and make them ready to safely and trustworthily integrate Al technologies into their operations. The

outcomes of this flagship will contribute to building trust and enhancing competitiveness, via better processes and services that enhance public administration capacity and efficiency, and reduce administrative burden.

Indicative support measures

Member State administrations can design requests that include the following, considering their current level of digitalisation and capacity for data exchange through interoperable and automated databases.

The below is an indicative, non-exhaustive list of support measures:

- Working towards implementing EU legislation and principles in the digital realm, including the Single Digital Gateway, the Interoperable "once-only" Europe Act. the and principle across EU **Public** Administrations enhance to interoperability. The support may also include support for implementing the Digital Services Act, Digital Markets Act, or the Data Governance Act.
- Supporting the design of a whole-ofgovernment approach whereby different parts of government collaborate to provide public services.
- Capacity building and process streamlining at all levels of government

- to prepare and carry out **Interoperability Assessments**.
- Fostering cross-border public services in collaboration with other Member States and, if applicable, the private sector.
- Establishing experimentation spaces for regulatory learning —such as regulatory sandboxes—to promote interoperability and innovative solutions tested in a controlled environment for regulatory experimentation.
- Designing specific use cases that integrate Al or other emerging technologies to improve the quality and the effectiveness of their services.
