Case Finland - Best Public Administration in the World – How was Strategy for Public Governance Renewal done ?

JUHA SARKIO
DIRECTOR GENERAL
MINISTRY OF FINANCE
JUNE 30, 2022

The Why?

Smooth public governance → a well-functioning democracy

Finnish public governance at the forefront of numerous international comparisons → However:

- the accelerating **climate crisis**,
- an **ageing** and **concentrated population**,
- **digitalisation** and the resulting transformation of work, and the globalisation

are challenging

→ The governance **structures and measures** that are mostly created over the last century

→ The **ability of a democracy and system to tackle the inter sectoral challenges** and guide social development.

A consistent and determined renewal of governance as described in the strategy, will **streamline** everyday **services**, ensure **legal certainty** in society and **create new opportunities** for business and communities.

A Joint, Co-creative Process by the Municipalities, Regions and the State

- Assignment given in the Government Programme in 2019
- Strong support for implementation;
- The Strategy adopted by a group of ministers and the board of the Association of Finnish Municipalities. These parties also monitor the implementation of the Strategy

The Strategy for Public Governance Renewal

Compact, easy to adopt strategy with

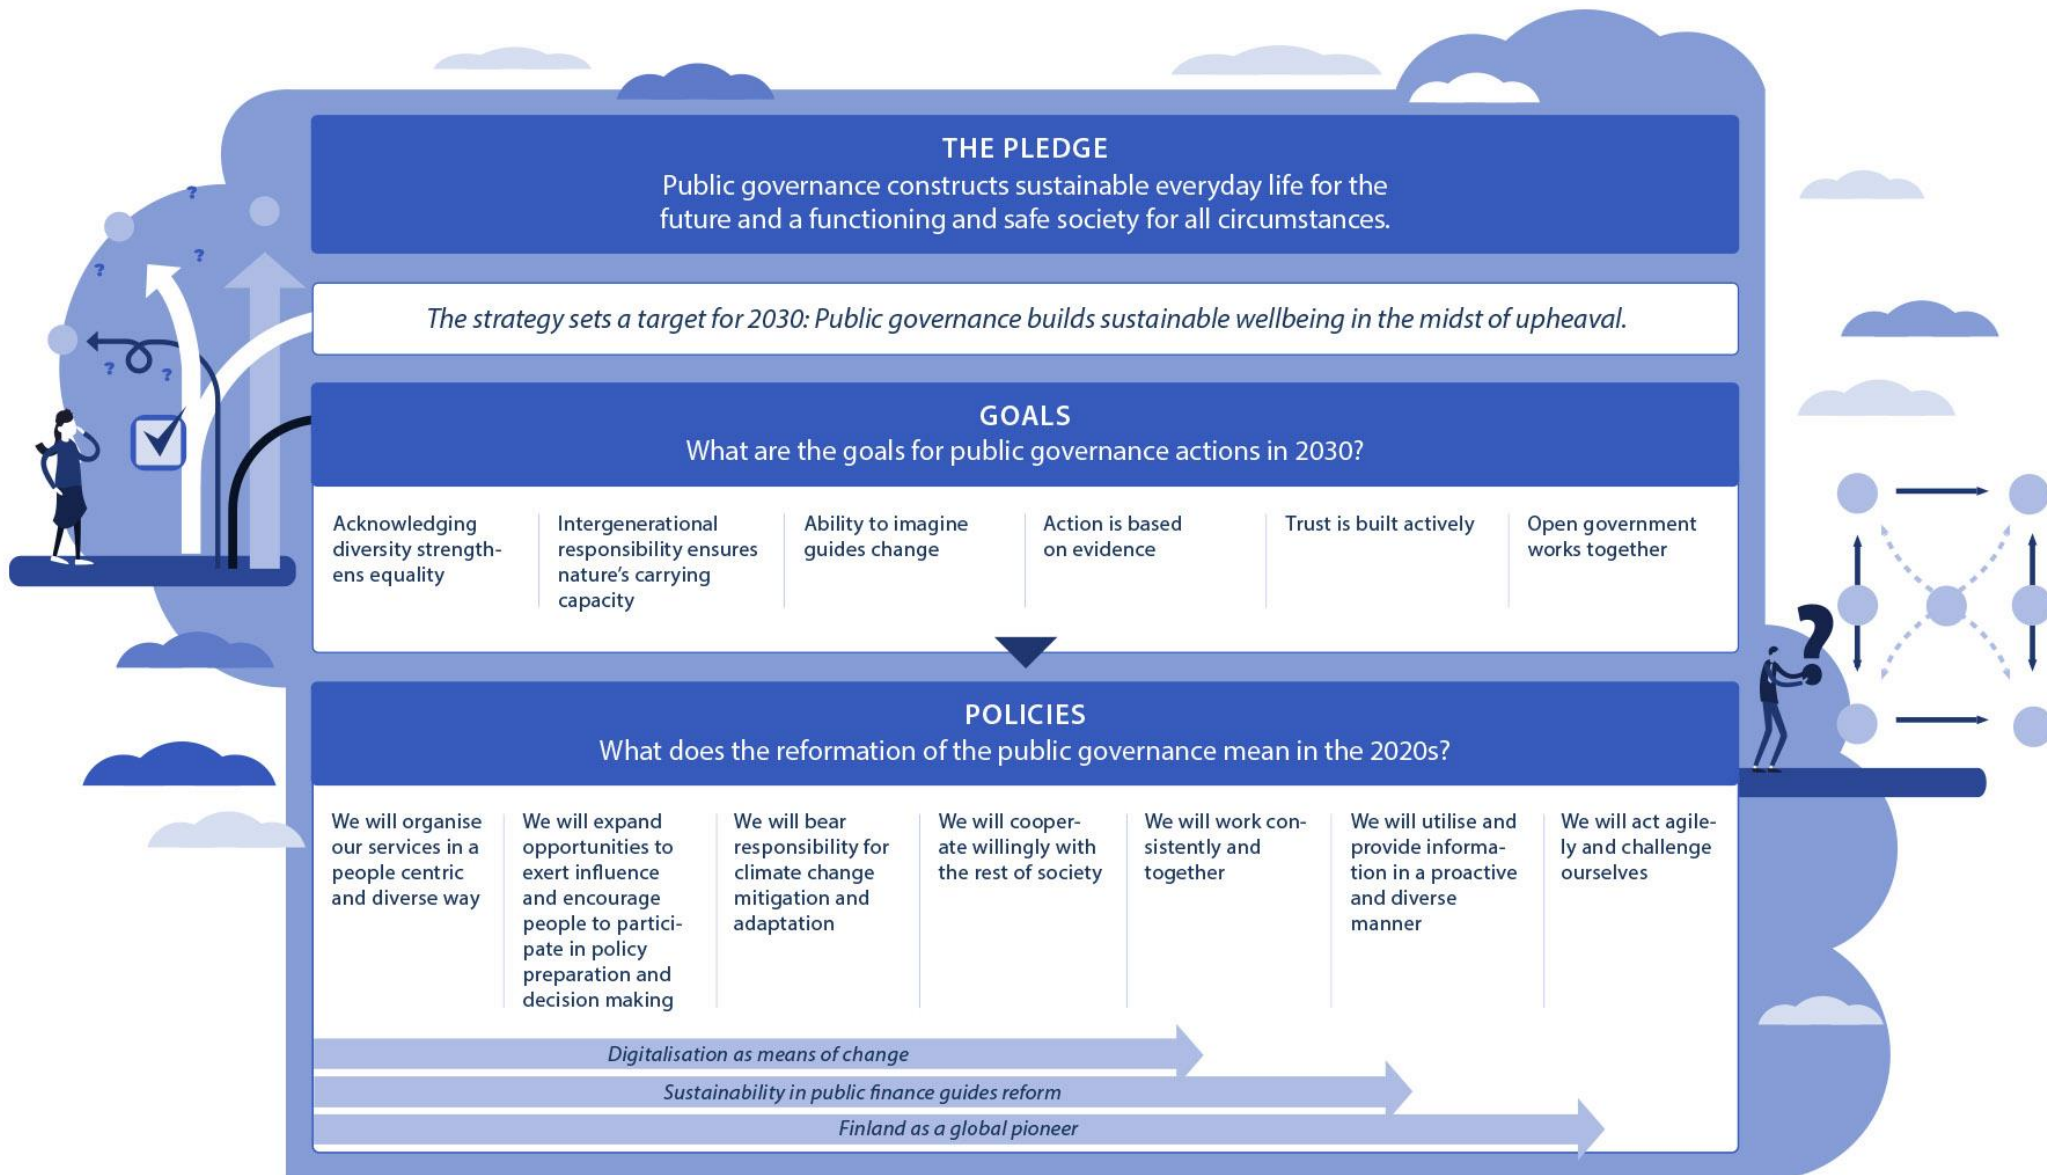

Clear, future oriented vision

Five strategic priorities and

Seven policy areas

The Strategy for Public Governance Renewal

The Participatory Process

A significant number of events where the content of the strategy was jointly developed during 2020

Otakantaa.fi – about 700 comments received on the draft

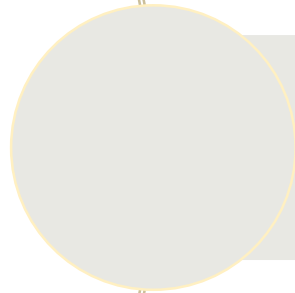

Due to the coronavirus epidemic, the majority of work is done through virtual workshops, online events, etc

Clear Focus on implementation and not only in Strategy itself

More than 100 Events: room for dissemination and on line discussion

Support available: 9 videos, also included in high level and middle management training on all levels, easy access on eLearning platform

Joint development has been launched: e.g. local and central government – “refineries” and democracy work in counties

Communicating the Main Messages Widely
