

# Government Analytical Unit

Úřad vlády České republiky

- **Problem:** Lack of evidence-informed policymaking in general and existing framework (RIA) used in a “formalistic“ way.
- **Intervention:** Creating “Government Analytical Unit“ at the Office of the Government, which works with willing ministries and provides hands-on expertise - “teaching-by-doing“
- **Requirements:** 1) Political support and position, 2) sufficient expertise in the team, 3) leadership able to connect analysis with public administration
- **Effect:** (current state-of-play) Several projects with line ministries and with Office of the Government
