Task overview ICT coordination

Core tasks

		Level		Priority	Task allocation
Cluster Description	Skills	SG School	КТ	•	Person 1 Person 2 Person 3
Technical Maintain hardware: install, configure, repair, and replace PCs and peripherals, servers, and network equipment					
Technical Use tools to monitor the ICT infrastructure	- Technical knowledge - Specialisation				
Technical Install and maintain the help desk Technical Provide first line response to colleagues about basic skills	- Open to further training and/or retraining				
Technical Plan and structure network and server infrastructure	- Knowledge of school context not a				
Technical Manage access to buildings (badge system) and applications (in-house school dashboard for class councils, contact with parents, enrolment, etc.)	requirement - Preferable: ICT education, Bachelor's degree				
Technical Manage communication channels (telephony, smartphones, WAN connections, etc.)	level				
Technical Install, manage, and maintain audio-visual equipment					
Technical Implement and monitor a backup strategy including archiving Technical Draw up a disaster recovery plan	_				
Technical Install, integrate, develop, and maintain software packages	-				
Technical Install and configure specific industrial software packages (CAD, PLC, controllers, microcontrollers, etc.) (only in TSO/BSO)					
Technical Install and configure specific hardware and software for students with specific educational needs (especially in special education)					
Technical Manage educational software, including electronic learning environments, apps, and websites					
Technical Install, update, and maintain tools and specific software for the (student) administration					
Technical Install and manage the school network, school server(s), and firewall (security) Technical Resolve ICT problems (hardware, software, sostwitt) and perform repairs	4				
Technical Resolve ICT problems (hardware, software, security) and perform repairs Technical Manage spare parts stock	-				
Technical Manage peripherals linked to the network (e.g. copiers)	1				
Technical Be knowledgeable about non-curricular equipment and software to enable ICT management (e.g. scripting)					
Technical Design and technically manage the school website and various (social) media channels	4				
Technical Prepare/set up projects in a test environment Technical Manage camera surveillance and other services over the network (e.g. boiler plant)	4				
Technical Manage camera surveillance and other services over the network (e.g. boiler plant) Technical Coordinate ICT infrastructure work (e.g. cabling)	-				
Technical ICT support for major events and projects	-				
Technical Tools and support for distance learning					
Technical Professionalise the ICT core team on the technical front (continuing professional development, self-study, literature, etc.)					
Teaching & lear Support teachers in ICT integration in the classroom and cross-curricular work Teaching & lear Write manuals on how to use hardware and software	- Teaching experience or pedagogical knowledge				
Teaching & learn write manuals on now to use naroware and software Teaching & learn Develop a teaching guideline on digital competencies for teachers	- Technical background or interest				
Teaching & learn Develop a teaching guideline for the Digital Competence and Media Literacy learning outcomes in collaboration with the team	- Preferable: teacher training				
Teaching & lear Sensitise and motivate colleagues about ICT applications in their subjects and areas of study					
Teaching & lear Professionalise the ICT core team on pedagogic-didactic front (continuing professional development, self-study, literature, etc.) Teaching & lear Implement ICT in an innovative and pedagogical-didactic manner in the classroom (educational innovation)					
Teaching & learn Provide colleagues with information on new learning resources	-				
Teaching & learn Monitor responsible ICT use in the school (use of social media, mobile devices, wireless network)					
Teaching & lear Organise and/or give in-service ICT training to the school team					
Teaching & lear Forming networks with other schools in the area of educational innovation	_				
Teaching & learn Follow educational innovation trends Policy&Vision Understand and be able to identify the team's ICT needs					
Policy&Vision Develop a pedagogic-didactic ICT vision in collaboration with the director and/or school team	- Analytical skills				
Policy&Vision Develop a technical ICT vision in collaboration with the director and/or school team	- Planning and prioritising				
Be able to draw up an ICT policy plan or action plan jointly with the director and/or an ICT core team (with both technical and didactic objectives)	- Social skills and change management				
Policy&Vision and associated investment policy (per year & multi-year plan)	- Preferable: Master's degree				
Policy&Vision Provide recommendations on ICT investments at the micro, meso, and macro levels Policy&Vision Motivate, engage, guide, and professionalise colleagues					
Policy&Vision Be closely involved with/part of the management team	7				
Policy&Vision Communicate on a regular basis about ICT policy actions					
Policy&Vision Draw up requests for quotes and specifications	4				
Policy&Vision Provide recommendations on ICT competencies when recruiting staff Policy&Vision Provide recommendations on ICT tools for communication and organisation within the school	-				
Policy&Vision Draw up guidelines on digital safety for teachers and learners (GDPR)	┪				
Policy&Vision Use data to develop, guide, and safeguard actions in ICT policy					
Policy&Vision Participate in the ICT consultative body within the school community					
Policy&Vision Participate in projects (Flemish, Belgian, European, etc.)	4				
Policy&Vision Be present on behalf of the school at ICT days and fairs, and maintain contacts Administration Implement user management and lay-out electronic learning environments					
Administration Create and manage email and (internet) accounts	No specific knowledgeInterest in and aptitude for ICT				
Administration Manage the laptop/tablet pool	- Secondary education diploma				
Administration Manage the school network					
Administration Follow-up on requests for quotes and specifications	4				
Administration Updating school website and various (social) media outlets Administration Encourage colleagues to make contributions to the website and intranet	-				
Administration Draw up an inventory of school hardware and software	†				
Administration Follow up on orders and repairs					
Administration Follow up on insurance policies	_				
Administration Licence management, consumables, copyrights, Reprobel, Auvibel			I		<u> </u>

Task overview ICT coordination

Core tasks

Cluster	Description
	Maintain hardware: install, configure, repair, and replace PCs and peripherals, servers, and network equipment
Technical	Use tools to monitor the ICT infrastructure
Technical	Install and maintain the help desk
Technical	Provide first line response to colleagues about basic skills
Technical	Plan and structure network and server infrastructure
Technical	Manage access to buildings (badge system) and applications (in-house school dashboard for class councils, contact with parents, enrolment, etc.)
Technical	Manage communication channels (telephony, smartphones, WAN connections, etc.)
Technical	Install, manage, and maintain audio-visual equipment
Technical	Implement and monitor a backup strategy including archiving
Technical	Draw up a disaster recovery plan
Technical	Install, integrate, develop, and maintain software packages
Technical	Install and configure specific industrial software packages (CAD, PLC, controllers, microcontrollers, etc.) (only in TSO/BSO)
Technical	Install and configure specific hardware and software for students with specific educational needs (especially in special education)
Technical	Manage educational software, including electronic learning environments, apps, and websites
Technical	Install, update, and maintain tools and specific software for the (student) administration
Technical	Install and manage the school network, school server(s), and firewall (security)
Technical	Resolve ICT problems (hardware, software, security) and perform repairs
Technical	Manage spare parts stock
Technical	Manage peripherals linked to the network (e.g. copiers)
Technical	Be knowledgeable about non-curricular equipment and software to enable ICT management (e.g. scripting)
Technical	Design and technically manage the school website and various (social) media channels
Technical	Prepare/set up projects in a test environment
Technical	Manage camera surveillance and other services over the network (e.g. boiler plant)
Technical	Coordinate ICT infrastructure work (e.g. cabling)
Technical	ICT support for major events and projects
Technical	Tools and support for distance learning
Technical	Professionalise the ICT core team on the technical front (continuing professional development, self-study, literature, etc.)
Teaching & learn	Support teachers in ICT integration in the classroom and cross-curricular work
Teaching & learn	Write manuals on how to use hardware and software
Teaching & learn	Develop a teaching guideline on digital competencies for teachers
	Develop a teaching guideline for the Digital Competence and Media Literacy learning outcomes in collaboration with the team
Teaching & learn	Sensitise and motivate colleagues about ICT applications in their subjects and areas of study
	Professionalise the ICT core team on pedagogic-didactic front (continuing professional development, self-study, literature, etc.)
Teaching & learr	Implement ICT in an innovative and pedagogical-didactic manner in the classroom (educational innovation)
	Provide colleagues with information on new learning resources
Teaching & learn	Monitor responsible ICT use in the school (use of social media, mobile devices, wireless network)
