

Towards **ComPAct** measuring results

ComPAct Objectives

General objective:

Enhance the **European Administrative Space** by promoting these principles and reinforcing its **support for the administrative modernisation** of the Member States.

Pillar 1

Foster **administrative cooperation** between public administrations at all levels to help **develop their workforces** for current and future challenges.

Pillar 3

Strengthen the **capacity** of public to **lead the green transition and build resilience**.

Pillar 2

Strengthen the **capacity** of public administrations for their **digital transformation**.

ComPAct policy links

Provided support

- TSI
- Digital Europe programme
- Horizon
- Others

EU Skills agenda

- Participation of adults aged 25-64 in learning
- Share of adults aged 16-74 having at least basic digital skills
- The right skills for jobs: Skills to support the green transition

Single Market SB

- Use of EMAS (certified organisations)
- Reduced EMAS gap among countries

Digital decade KPIs

- Digital public services for citizens / for businesses
- Improved access to services

ComPAct measurement next steps

- How to capture results not captured anywhere: AI, interoperability, green transition, implementation, reduction of administrative burden ...
- Most results will capture provided support, number of countries/ organisations participating
- Data collection at minimal administrative burden – measuring the uptake of support results will require additional reporting
- Qualitative results – cases and examples of reforms

We will develop a draft further and share the proposal to discuss
